

My Jupyter Notebook on IBM Watson Studio

****ESTHER**
Senior Manager Enterprises

**IBM Watson studio is unable to load for some reason and this is why I have reverted to this assignment in my Coursera Environment which loads Jupyter much faster.*

**I am interested in Data Science as this may be a interesting career path within the financial sector.*

I have decided to create a scatter plot

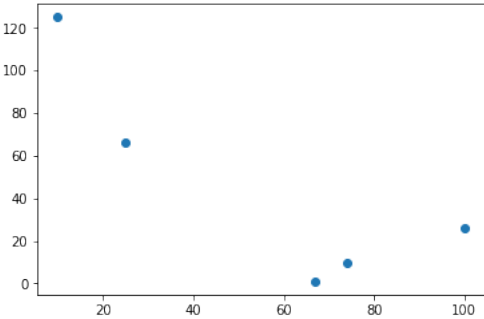

In [2]:

```
import matplotlib.pyplot as plt

xs=[10,100,25,67,74]
ys=[125,26,66,1,10]

plt.scatter(xs,ys)
```

Out[2]: <matplotlib.collections.PathCollection at 0x7fda192a8e10>

```
* This is a bullet list
* This is a bullet list
* This is a bullet list

1. This is a numbered list
2.
3.
4.

~~The End~~
```
